BASIC ASSURANCES®

An Introduction

Key Concepts

The Basic Assurances® focus on essential, fundamental, and non-negotiable requirements for all service and support providers

- Organizations are encouraged to implement consensus best practices in relation to each measure
- The Basic Assurances® require more than compliance with licensing and certification standards. We use this tool to understand the effectiveness of practice through the perspective of each person.

BASIC ASSURANCES®

Structure

Factor:

Dignity and Respect (Topic Area)

Indicator:

2a People Are Treated As People First (Sub-Topic)

Probes: (Questions to support validation of the indicator)

1. Are people called by their preferred names?
2. Does staff refrain from referring to people by their disability, diagnosis or condition?
3. Are people extended the same common courtesies anyone would expect?
4. Does the organization's name, letterhead and internal and public communications promotes a positive image of people, services and supports?
5. Are support staff trained to promote dignity and respect and to recognize each person as a unique individual?

BASIC ASSURANCES[®]

System and Practice

Structure

Two components are evaluated: System and Practice

- Systems are those organizational supports that provide the structure for organizational practices. This may include policies, procedures, staff training or other types of systems
- Organizational practice is what is observed in daily operations. This demonstrates how an organization's systems are put into action

BASIC ASSURANCES®

Factor 2: DIGNITY AND RESPECT

Process and Evidence

DIGNITY AND RESPECT

Process and Evidence

- Document Review
- Observation and Visits
- Focus Groups
- Factor Review
- POMs

DIGNITY AND RESPECT

Process and Evidence

Document Review

- Policies and procedures
- Committee meeting minutes
- Completed assessments
- Staff training records
- People's records (with permission)
- Complaint Logs
- Wage data

DIGNITY AND RESPECT

Process and Evidence

Observation and Visits

- Is people first language used?
- Is the home decorated in a way similar to others in the community?
- Are people afforded privacy during their daily routines?
- Are people observed to have clothing, personal items, and hairstyles that reflect their preferences?
- Are the activities observed appropriate for people's age and culture?
- Do activities promote people's dignity?
- Are people engaged in meaningful work for which they are paid fairly?
- Is there camaraderie among staff and people receiving services?

DIGNITY AND RESPECT

Process and Evidence

Focus Groups

- Focus groups may be conducted with people supported, staff, families and others depending on the types of services and accreditation
- Focus groups allow us to better understand systems and practices from the perspective of those that are affected by them
- Sample Questions:
 - Do people listen to your ideas and honor your choices? (people supported)
 - What is your role in assisting the person to feel respected? (staff)
 - How does the organization show respect to your family member? (family)

DIGNITY AND RESPECT

Process and Evidence

Factor Review

- Each factor is reviewed with organizational members that have a role in the implementation of systems and practice pertaining to that factor
- This is an opportunity for the organization to provide examples of what each area looks like in practice
- It is also an opportunity to ask questions and share best practices

DIGNITY AND RESPECT Process and Evidence

Personal Outcome Measures®

Personal Outcome Measures® allow us to better understand quality through the perspective of the person

- The person's experience helps us to understand the effectiveness of systems and practices implemented by the organization
- Interviewees are often selected from categories such as people with a restriction in place, people with extensive health supports, or people that have experienced abuse and neglect

Factor 2: DIGNITY AND RESPECT

Validation and Decision-Making

DIGNITY AND RESPECT

Validation and Decision-Making

- Each probe is validated present or not present based on evidence obtained during the review
- Each indicator is validated at the systems and practice level
- Indicators are validated based on a preponderance of evidence related to an indicator, not based on a given number of probes found to be present or not present
- During an accreditation, when an **indicator** is found to be not present in systems and/or practice, an action plan is required
- The title of the indicator is not always a complete description of all of the elements contained within an indicator

Factor 2 Measurables:

- % of people who are satisfied with the resolution on their grievances
- # of people working in integrated employment settings
- % of people with POM interviews
- % of people with entrance door keys
- % of staff trained to promote dignity and respect
- \$ people are paid
- POMs: People are Respected, People are Treated Fairly, People Choose Where and With Whom they Live, People Choose Where They Work, People Choose Services, People Choose Personal Goals, etc.
